

Davis Little League COVID-19 Prevention Plan

Davis Little League's (DLL) mission is to provide an environment and opportunities for the youth of Davis to play baseball. DLL wants to continue to offer that opportunity, despite the challenges faced during the COVID-19 pandemic. Furthermore, DLL is committed to the safety of our players, families, coaches, and other volunteers, and this document serves as the foundation of our safety plan this year.

DLL acknowledges that conditions and guidance from the State, County, and City change frequently and will adopt practices accordingly. DLL acknowledges that as a volunteer-run, non-profit organization, it lacks the expertise to develop unique or special protocols to effectively combat COVID-19 infections. As such, DLL will rely on the guidance issued from the State of California, Yolo County, and City of Davis, Little League International, and the CDC. DLL will also engage and consult with local health officials to determine the best practice for our organization.

On March 5, 2021, the [State of California issued new guidance](#) governing youth sport competition. This guidance provides a roadmap to allowing competitive baseball games, based on the severity of COVID infections in a particular county. As Yolo County reached the orange tier on March 23, 2021, the following guidelines and policies are set forth effective March 24, 2021.

In December 2020, [Healthy Davis Together](#), a partnership between the City of Davis and UC Davis began offering free community COVID-19 testing, to every Davis resident. Davis Little League encourages all participants and their families to utilize this free testing on a weekly basis.

DLL will comply with the State of California requirements with respect to COVID-19. The league Safety Officer will serve as the supervisor to ensure all participants and events are in compliance with these guidelines.

Additional safety information and best practices with respect to youth baseball can be found here:

- [CDC - Playing Sports](#)
- [California Department of Public Health - Outdoor Youth Sports](#)

- [Little League International - Best Practices](#)
- [American Academy of Pediatrics - Return to Sports](#)

This document is to be modified and updated as guidelines with respect to COVID-19 change during the season.
